

Tuesday

- Tasks 1 and 2
- Processing to generate visuals
 - DSL - domain specific language like Java
 - variables are ~~not~~ retained between each render loop

fullScreen();

pkill xfce4-panel ↙ kill Pi windows manager for full screen

- Dev vs Prod
 - hit one button to move dev to prod
 - dev close to prod
- Cross compilation x86 to ARM is bad
 - compile on device is better
 - compile takes time → put compiled binary in git to make restores quicker
- Docker:
 - a VM / container
 -

/etc/rc.local ↙ boot file
